

**INCIDENT ACTION PLAN**

To be completed in accordance with your network

Location	Control Level	Operational Period	
Bayou Corne Sink Hole	Company Supervisory	From 09:00	To 16:00

<b>1.0 SITUATION</b> Disease, community, environment  PROMPTS: Weather, disease trends, Resources, Hazards & safety  REFERENCE: Maps, weather reports, Sitreps, appreciation, warnings, alerts	<b>CURRENT</b>  <b>Partly cloudy @ 14:00</b>  <b>PREDICTED</b>  <b>Cloudy</b>
<b>2.0 OBJECTIVES (or MISSION)</b>  PROMPTS: Time & space  REFERENCE: Appreciation – control options, courses open to disease	<b>CURRENT WORK</b>  Monitor surface water quality around sinkhole to measure salinity levels around the sinkhole.  <b>Work Plan:</b> Personnel will access previously marked surface water sampling locations by airboat (location map attached). Water quality parameters in each location will be measured for electrical conductivity (EC), total dissolved solids (TDS), oxidation reduction potential (ORP), pH and temperature and recorded in a field log book. A table summarizing surface water quality data for 8/20/12 is attached. A photo will be taken at each location. Samples were collected on 8/20/12 and will be collected periodically as needed. Samples are collected by filling an unpreserved plastic jar at the surface of the water. The lid is secured and the sample is placed on ice for shipment to the lab. The samples are under chain of custody from collection until delivery to the lab. Samples will be analyzed for chlorides, TDS and EC. Final laboratory reports may take between 2 to 3 weeks for completion.
<b>3.0 EXECUTION</b> add safety information as appropriate	
<b>GENERAL OUTLINE</b>  PROMPTS: Strategies & tactics, current proposed alternate  REFERENCE: Appreciation, Control Options	<b>Crew Safety:</b> To ensure the safety of the water sampling collection crew, samples will not be collected adjacent to the open sinkhole area or in areas with trees adjacent to the open sinkhole area.  One air monitoring device shall be operated on the boat. The device will monitor H2S, O, CO, VOC, and LEL. In addition, air monitor stations (recording the same parameters) will be monitored remotely. PPE will include hearing protection, non-steel toed boots (boating safety), life vests, safety glasses and gloves for collecting and handling samples.
